

## Instructions for Accessing DTIC

*The Defense Technical Information Center (DTIC) is a secure document repository available to authorized DoD personnel, defense contractors, federal government personnel, government contractors, and select academic institutions. DoN-SEC now has a [home page](#) hosted on this site that contains updates, reference documents, and submission hubs for experimentation events.*

*To create a DTIC account, follow the below steps. Registering for this site requires a valid DoD-recognized X509 client certificate (smart card). Certificates that meet this requirement include DoD-issued Common Access Cards (CAC), External Certification Authority (ECA), Personal Identity Verification (PIV) or Commercial Identity Verification (CIV).*

- 1. Navigate to the DTIC [Home Page](#).*
- 2. Click the “Create your DTIC” option on the left of the page under the “New to DTIC?” heading.*
- 3. Insert your smart card and click the Smart Card button.*
- 4. Start the form by entering your work email address, a .mil account works best. You will receive a security code to complete your registration. **Please note, there is a resolution in development for the registration of .com email addresses.***
- 5. You will receive registration confirmation via email once complete. To sign in for the future, you can use your smart card and the PIN it is associated with.*

*Once set up in DTIC, you will see many options on the home page. DoN-SEC utilizes the [DODTechipedia](#) sector—from there you can access the DoN-SEC page (as well as innumerable DOD organizations and libraries).*

***For the C4F/DoN-SEC 2024 experiment**, please submit completed form and quad via DTIC at this [link](#). This page can also be found by navigating to the Events > C4F/DoN-SEC 2024 hub from the DoN-SEC home page. Submissions should include the provided form and quad in a zip folder labeled with your company and technology name.*

*Frequently Asked Questions can be found [here](#). If you experience issues with DTIC, please contact [Victoria.m.starke@ausgar.com](mailto:Victoria.m.starke@ausgar.com) for alternative submission methods.*
